EXPERIENCE

OPENBAY | Software Engineer
October 2018 – September 2019 | Cambridge, MA
Openbay (Ruby on Rails)
- Worked directly under the guidance of CEO regarding key business priorities
- Assist with interviewing prospective new employees for the company
- Implement various frontend and backend changes needed in order to enable a partnership with Lyft, allowing Lyft drivers to receive discounted car repair services through the platform

Otis (Ruby on Rails • Vue.js)
- Implement features for Openbay's "Otis" chatbot, an conversational AI tool which seeks to aid customers in scheduling car repair services

LOCALYTICS | Software Engineer
April 2015 – April 2016 | Boston, MA
Localytics Predictions (Ruby on Rails • Angular • AWS - EMR)
- Created the end to end frontend experience for the Localytics 'Predictions' product, a new top-level page on the Localytics Dashboard with new UI components including Graphs, Tables, and Modals
- Designed and implemented visualizations and tools enabling customers to understand complex data science output at a glance, and take action on it
- Created the linking logic between the client-side code and data science logic running in Amazon EMR

PAYPAL | Software Engineer II
June 2013 – April 2015 | Boston, MA
WhiteGlove (Ruby on Rails • Angular • MySQL • Chef • Capistrano)
- Full stack web application used by PayPal marketing managers to create, view, edit, and generally manage PayPal offers and incentive programs
- Worked in a small team to build original version in Spring Framework, then was one of two principal contributors in its migration to Ruby on Rails
- Designed and tested software to enable a 'punch card' experience at multiple locations country-wide; an entirely new experience for PayPal consumers

Continuous Integration (Jenkins CI)
- Hosted a Jenkins instance for my team upon seeing need for automation
- Created a set of jobs to unit test, UI test, and sign off on submitted code, as well as perform regular QA releases, generate release notes, and other tasks

OTHER
May 2016 – October 2018
Unreleased Mobile Game Concept (Haxe Language • Flixel Game Framework)
- Retro style Role Playing mobile game under development, using entirely scratch-made assets, interface, and game logic

Union Square Donuts (Hands • Glaze • Eggs)
- As team lead in the kitchen, I ensured that all aspects of food prep went smoothly and that we produced delicious products to high quality standards

Brookwood Community Farm (Hands • Soil • Seeds)
- Member on a small team responsible for all variety of seeding, cultivating, harvesting, and distributing vegetables and product

America (bike)
- Rode across the continental United States, documenting my experience on **my blog**
